

Fish Classroom News

March 22, 2018

The fish project is going well! The children love listening to clues and guessing the object! They also enjoy finding things in the room based on the clues they are given. Hopefully your child told you about our rectangle hunt, ABC hunt, and our search for gold! The joy on their faces as they participate in these activities is what makes Project work so perfect for preschool! After Spring Break we plan on bringing in two experts: a photographer and a collage expert. The photographer will help us learn how to take close-up photos, and the collage expert will assist us in creating a visually appealing collage.

HOMEWORK: Please send a 16oz. empty water bottle, filled with 5 tiny items, to school with your child. We will use these for a Seek and Find activity!

We hope you have a relaxing Spring Break and are able to enjoy some actual Spring-like weather! Happy Easter!

~ Jen & Sharon

Dramatic Play

We have a vegetable and flower garden!

Author Study

Our author focus is on Jonathan London, author of the Froggy series.

Science

We are exploring magnets!

Math

The children are learning to recognize that 10 objects equals the numeral 10.
